SV2157 VB F1 (U)	Semi savoy	7	6	DM 1-13, 15, 16	Baby/Bunch	spring/fall slot, thick glossy leaves

SPECIALTY

Leaf attributes

Resistances

NEW! RED TABBY F1 (U)

Green leaf/ Red vein and stem

HR: DM 1-9, 11-13 | IR: DM 10

Improved Red Kitten with more intense dark red stems and darker green leaves that are glossy and thick. Red Tabby can be grown year-round for baby leaf, with added protection in cold months. Color is darkest in warm weather.

NEW! RED SNAPPER F1 (U)

Green leaf/ Red vein and stem

HR: DM 1-7, 9, 11-17

Specialty red vein spinach with unique narrow, lobed and serrated leaves. Red Snapper is easy to grow without the pest pressure of arugula, which it resembles. Medium speed for all season performance. Recommended for baby leaf production.

NEW! GROUPER F1 (U)

Green leaf/ Green vein and stem

HR: DM 1-7, 11, 13,15,16

Slender, oak leaf spinach for baby leaf production. Grouper is similar in shape to wild arugula, with mild, spinach flavor. An interesting addition to salad mixes without the pest pressure of brassica components.
